## EDUCATION

### Harcourt Butler Technical University

B.Tech Electronics Engineering *GPA: 8.5*

Kanpur

December 2020 - July 2024

### Blue Bells Public School

Intermediate Mathematics *GPA: 95%*

Jhansi

2018 - 2020

### Blue Bells Public School

HighSchool Mathematics and Computer Science *GPA: 93%*

Jhansi

2016 - 2018

## EXPERIENCE

### engineer@HUB | Web development Mentor

Remote | December 2021 - March 2022

- I was a Web Development Mentor and was assigned the task to guide students on their day-to-day coding queries and encourage them towards betterment. It was overall a very learning experience, and I get to know about the effort that one needs to put to help others.

## SKILLS

Programming Languages:	Data Structures, Algorithms, C++, Javascript, Html, CSS
Libraries/Frameworks:	Bootstrap, React.js, MaterialUI, Express, Node.js, Mongoose, Rest APIs.
Tools / Platforms:	Vs Code, Git, Github
Databases:	MongoDB

## PROJECTS / OPEN-SOURCE

### Personal Portfolio | [Link](#)

*Html, CSS, Javascript, React.js, MaterialUI, Firebase*

This is my personal Portfolio website which displays all my skills and achievements. A proper projects section is included which contains all the projects I have worked till date. It also contains a contact form that sends all the data entered to a real-time database built on firebase.

### Dice Game | [Link](#)

*Html, CSS, Javascript*

It is a typical pig game. Currently, it supports only the Two-Player format.

### Mausam | [Link](#)

*Html, CSS, Javascript, Node.js, MongoDB, Express, Mongoose*

It is a simple Weather App that tells the current weather(Temperature, Windspeed, Humidity). It uses three different APIs: 1- One which detects the current location of the user using the reverse geocoding concept. 2- The Second is an API from Mapbox which returns the coordinates(latitude, longitude) of the location entered by the user. 3- The last one is from Weatherstack which gives the weather details of the place searched by taking in the coordinates through queries. Overall the front end and the backend API systems are integrated to give a good user experience.

## HONORS & AWARDS

Google Kick Start 2022 Round A (Global Rank-4479)

Coding Ninja CodeKaze Coding competition (AIR-6047)

6 star on Hackerrank (Problem Solving)

5 star on Hackerrank (C++ Language)
