## EDUCATION

**Harcourt Butler Technical University, Kanpur**

B.Tech, Electronics Engineering

Dec 2020 - June 2024

7.9 CGPA

**Blue Bells Public School, Jhansi**

Intermediate (12th) - ISC

April 2018 - June 2020

94.75%

## TECHNICAL SKILLS

**Languages and Data Structures:** C++(including OOPS), Data Structures and Algorithms in C++, JavaScript

**Libraries/Frameworks:** Next.js, React.js, Node.js, Express.js, Tailwind CSS

**Tools / Platforms:** Bitbucket, GitHub, VsCode, Sanity Studio, Operating System

**Databases:** MongoDB, MYSQL

## EXPERIENCE

**Langoor, Full Stack Developer Intern**

July 2023 - **Present**

- Worked on a Project from **Figma design to the deployment** phase, leveraging **Next.js** for server-side routing. Reduced loading time by **30%**, enhancing user experience and response rates
- Utilized **Tailwind CSS** for the front-end design, accelerating development by **40%** rapid feature implementation
- Employed MongoDB for efficient database management, seamlessly **updating content with Sanity IO**. Optimized data retrieval and storage, leading to a **25%** performance boost and improved user satisfaction
- Managed **version control using Bitbucket**, actively raising pull requests and incorporating valuable reviewer feedback for a robust and collaborative codebase

**Chegg India, Subject Matter Expert - Computer Sc**

Feb 2023 - June 2023

- Experienced Chegg Expert with expertise in solving **100+ CS and DSA** problems in multiple languages for students worldwide. Skilled in providing clear and concise solutions, and honing thinking abilities
- Impressive CF Score of **around 80 %**

## PROJECTS

**Careers Portal (Tech Stack - NextJs, MaterialUI, MongoDB, SanityIO, Tailwind CSS)**

[Link](#)

- Developed a feature-rich Next.js-based web application with **NextAuth.js for Google authentication**, reducing user login and registration **time by 30%**
- Implemented **routing** for navigation, including a job listings page and user-specific application records.
- Efficiently managed job listings content through **Sanity.io CMS** (Content Management System), with user application data securely stored on MongoDB hosted on **MongoAtlas**, ensuring robust data management and scalability, reducing database access **time by 25%**

**Personal Portfolio (Tech Stack - ReactJs, MaterialUI, Firebase)**

[Link](#)

- The integration of ReactJS, Material UI, and Firebase allowed for a seamless user experience that enhances the overall presentation of my portfolio
- This combination of technologies showcases **10+ Technical Skills**

**Speech To Text (Tech Stack - ReactJs, MaterialUI, React-speech-recognition, MyMemory API)**

[Link](#)

- 2 languages supported (English and Hindi) **React.Js** website for speech-to-text and text-to-Hindi conversion.
- Utilized **React Speech Recognition module** and MyMemory API for accurate translations
- Ensured a user-friendly experience, supporting real-time translation between Hindi and English

## ACHIEVEMENTS AND AWARDS

- 3 Star **CodeChef** (Highest rating-1740) and Pupil on **Codeforces** (Highest rating-1259)
- Solved **1500+ DSA questions** on CodeForces, Codechef, **Leetcode**, GFG
- Google **Kickstart** Global Rank: 3032 and Newton School-CodeRush March Edition: **Rank - 86**
